

# Monoclonal Anti-human EZFIT Antibody

## ORDERING INFORMATION

**Catalog Number:** 2ZK9716H

**Clone:** K9716

**GenBank:** AF269249

**Ig Class:** mouse IgG<sub>2A</sub>

**Volume:** 100 µL

**Concentration:** 1 mg/mL

**Formulation:** A liquid formulation in physiologic saline (contains 0.1% NaN<sub>3</sub>)

**Storage:** ≤ -20° C

**Specificity:** human EZFIT

**Applications:** Western blot  
Direct ELISA

## Preparation

Produced in BALB/c mouse ascites inoculated with a hybridoma of spleen cells of a BALB/c mouse immunized with recombinant human EZFIT (endothelial zinc finger protein induced by TNF-α) (amino acids 6 - 199) and mouse myeloma cells (NS-1) (Mataki, C. *et al.* (2000) *J. Atheroscler. Thromb.* 7(2):97). The IgG fraction of ascites fluid was purified by ammonium sulfate fractionation.

## Formulation

A liquid formulation in physiologic saline (contains 0.1% NaN<sub>3</sub>).

## Storage

This antibody is stable for greater than six months when held at -20° C to -70° C in a manual defrost freezer. Upon thawing, the antibody can be stored at 2° - 8° C for at least 1 month without detectable loss of activity.

**Avoid repeated freeze-thaw cycles.**

## Specificity

This antibody specifically reacts with human EZFIT. Not yet tested in other species.

## Applications

**Western Blot** - This antibody can be used at 2 µg/mL with the appropriate secondary reagents to detect human EZFIT.

**Direct ELISA** - This antibody can be used at 0.1 µg/mL with the appropriate secondary reagents to detect human EZFIT.

**Optimal dilutions should be determined by each laboratory for each application.**
