

Ham's Nutrient Mixture F-12

*with 25 mM HEPES Buffer
without L-Glutamine*

Catalog Number:

M15050

Size:

500 mL

PRODUCT DESCRIPTION

Ham's Nutrient Mixture F-12, originally designed to support the serum-free growth of Chinese Hamster Ovary (CHO) cells, is used with serum supplementation for a variety of cell types. F-12 features higher concentrations of some components, as compared to Ham's F-10. F-12 includes including versions with HEPES buffer for a more effective buffering capacity.

Each lot of F-12 is prepared from a powdered base medium and tissue culture-grade water. Representative samples of each lot of F-12 are tested to confirm the absence of bacterial or fungal contamination using methods adapted from the current U.S. Pharmacopeia. F-12 is manufactured in our ISO 9001:2015 certified facility.

For the specific media formulation, please refer to the Media Formulation section of the datasheet.

STORAGE AND HANDLING

F-12 is supplied in gamma-irradiated, sterile PETG or PETE bottles. We recommend that F-12 be stored at a temperature of 2-8 °C, and protected from strong light. Always use aseptic techniques when handling and supplementing F-12.

PRECAUTION

When handling bio-hazardous materials such as human cells, safe laboratory procedures should be followed, and personal protective equipment should be worn.

LIMITATIONS

- FOR LABORATORY RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.
- The safety and efficacy of this product in diagnostic or other clinical uses has not been established.
- Results may vary due to variations among tissue/cells derived from different donors or sources.
