

DESCRIPTION

Species Reactivity	Mouse
Specificity	Detects mouse HSF4 in direct ELISAs and Western blots. In Western blots, approximately 25% cross-reactivity with recombinant human (rh) HSF4 is observed and less than 5% cross-reactivity with recombinant mouse HSF1 and rhHSF2 is observed.
Source	Polyclonal Goat IgG
Purification	Antigen Affinity-purified
Immunogen	<i>E. coli</i> -derived recombinant mouse HSF4 Gly343-Pro492 Accession # Q9R0L1
Conjugate	Alexa Fluor 750 Excitation Wavelength: 749 nm Emission Wavelength: 775 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Western Blot Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

HSF4 (heat shock factor 4) is a 55 kDa member of the HSF family of transcription factors. It is highly expressed in lens where it maintains lens integrity and blocks FGF synthesis. Mouse HSF4B is 492 amino acids in length. It contains one DNA binding region (aa 17-122) and a Leu-zipper trimerization domain (hydrophobic repeat-A/B) (aa 129-203). Two additional potential isoforms exist. The first isoform, termed HSF4A, is transcriptionally inactive and shows a 45 aa substitution for aa 245-319. The second isoform shows an 18 aa substitution for the first 78 amino acids of the N-terminus. Over aa 343-492, mouse HSF4 shares 93% and 72% aa sequence identity with rat and human HSF4, respectively.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
