

DESCRIPTION

Species Reactivity	Mouse
Specificity	Detects mouse SEZ6L in direct ELISAs. In direct ELISAs, less than 1% cross-reactivity with recombinant mouse (rm) BSRP-A and rmBSRP-C is observed.
Source	Polyclonal Sheep IgG
Purification	Antigen Affinity-purified
Immunogen	Mouse myeloma cell line NS0-derived recombinant mouse SEZ6L Glu32-Ser889 Accession # AAH65117
Conjugate	Alexa Fluor 594 Excitation Wavelength: 590 nm Emission Wavelength: 617 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Immunohistochemistry Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

SEZ6L (Seizure 6-Like protein; also BSRP-B/Brain-specific receptor-like protein B) is a 200-210 kDa member of the SEZ6 family of proteins. It is expressed in the plasma membrane and ER of CNS neurons, particularly cerebellar interneurons plus Purkinje and granule cells. SEZ6L likely regulates Ca⁺⁺ availability and thus impacts PKC α activation and mGluR1 signaling. Mature mouse SEZ6L is a 932 amino acid (aa) type I transmembrane protein. It contains an 866 aa extracellular domain (ECD) (aa 32-897) and a 45 aa cytoplasmic tail. The ECD shows three CUB domains and five short consensus repeats (SCRs). There is one 190-200 kDa splice variant termed BSRP-B that contains a Phe substitution for aa 807-872 of the fifth SCR domain. Over aa 32-889, mouse SEZ6L shares 80% and 97% aa identity with human and rat SEZ6L, respectively.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
