

DESCRIPTION

Species Reactivity	Human
Specificity	Detects human BAP31 in direct ELISAs and Western blots.
Source	Polyclonal Goat IgG
Purification	Antigen Affinity-purified
Immunogen	<i>E. coli</i> -derived recombinant human BAP31 Gly165-Glu246 Accession # P51572
Conjugate	Alexa Fluor 350 Excitation Wavelength: 346 nm Emission Wavelength: 442 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide
*Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.	

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Western Blot Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

BAP31 (BCR-associated protein of 31 kDa) is a 29 kDa member of the BCAP29/BCAP31 family of proteins. It is ubiquitously expressed, resides in the ER and serves multiple functions. It is known to act as a cargo receptor for ER export of transmembrane (TM) proteins, and serve as a component of the ER quality control compartment, cycling between the peripheral and juxtanuclear ER. Human BAP31 is a 246 amino acid (aa), 3-TM domain containing protein. Amino acids 1-6 are luminal, 124-246 are cytoplasmic, and 7-27, 44-64 and 103-123 constitute TM segments. BAP31 forms homodimers and heterodimers with BAP29. Cleavage between Asp164Gly165 and Asp238Gly239 generates 20 kDa and 27 kDa fragments, respectively. There is an alternate start site 67 aa upstream from the standard start site. Over aa 165-246, human BAP31 shares 82% aa identity with mouse BAP31.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
