

Rabbit IgG APC-conjugated Antibody

Antigen Affinity-purified Polyclonal Goat IgG Catalog Number: F0111 100 Tests

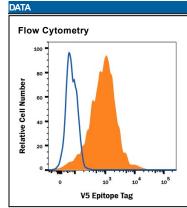

DESCRIPTION			
Species Reactivity	Rabbit		
Specificity	Rabbit IgG specific IgG was purified by rabbit IgG affinity chromatography.		
Source	Polyclonal Goat IgG		
Purification	Antigen Affinity-purified		
Immunogen	Rabbit IgG		
Conjugate	Allophycocyanin Excitation Wavelength: 620-650 nm Emission Wavelength: 660-670 nm		
Formulation	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details.		
	*Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.		

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

Flow Cytometry

Designed for use as a secondary developing reagent in immunofluorescent assays, such as flow cytometry, where the primary antibody does not have a fluorescent reporter, is of rabbit origin, and is of IgG class. The recommended concentration is $10 \, \mu L/10^6$ cells.

Detection of Rabbit IgG Primary Antibody by Flow Cytometry HEK293 human embryonic kidney cell line transfected with V5-tagged proteins was stained with Rabbit Anti-V5 Epitope Tag Monoclonal Antibody (Catalog # MAB8926, filled histogram) or isotype control antibody (Catalog # AB-105-C), open histogram), followed by Allophycocyanin-conjugated Anti-Rabbit IgG Secondary Antibody (Catalog # F0111) at 10 μL/10⁶ cells.

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage

Protect from light. Do not freeze.

• 12 months from date of receipt, 2 to 8 °C as supplied.
