

DESCRIPTION	
Species Reactivity	Human/Mouse
Specificity	Detects human and mouse TREM-2 in direct ELISAs and Western blots. Stains TREM-2 transfectants but not TREM-1 transfectants.
Source	Monoclonal Rat IgG _{2B} Clone # 237920
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	Mouse myeloma cell line NS0-derived recombinant mouse TREM-2 extracellular domain Accession # Q99NH8
Conjugate	Alexa Fluor 750 Excitation Wavelength: 749 nm Emission Wavelength: 775 nm
Formulation	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

	Recommended Concentration	Sample
Flow Cytometry	5 µg/mL	See Below

DATA

Flow Cytometry

Detection of TREM-2 in RAW 264.7 Mouse Cell Line by Flow Cytometry. RAW 264.7 mouse monocyte/macrophage cell line was stained with Rat Anti-Human/Mouse TREM-2 Alexa Fluor® 750-conjugated Monoclonal Antibody (Catalog # FAB17291S, filled histogram) or isotype control antibody (Catalog # IC013S, open histogram). View our protocol for [Staining Membrane-associated Proteins](#).

Flow Cytometry

Detection of TREM-2 in Human PBMCs by Flow Cytometry. Human peripheral blood mononuclear cells (PBMCs) were stained with Mouse Anti-Human Integrin αM/CD11b PE-conjugated Monoclonal Antibody (Catalog # FAB16991P) and either (A) Rat Anti-Human/Mouse TREM-2 Alexa Fluor® 750-conjugated Monoclonal Antibody (Catalog # FAB17291S) or (B) Rat IgG_{2B} Alexa Fluor 750 Isotype Control (Catalog # IC013S). View our protocol for [Staining Membrane-associated Proteins](#).

PREPARATION AND STORAGE

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	Protect from light. Do not freeze. <ul style="list-style-type: none"> 12 months from date of receipt, 2 to 8 °C as supplied.

BACKGROUND

TREM-2 is a single V-type Ig-like domain-containing transmembrane (TM) receptor that is expressed on cells of the hematopoietic and nervous systems. Although single residue polymorphisms may exist, one soluble isoform variant is reported that shows an 88 amino acid (aa) substitution for the C-terminal 66 aa of the TM isoform. TREM-2 is best known for its association with the adapter protein DAP12 that delivers an activating signal that plays a role in both the innate and adaptive immune responses.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
