

## DESCRIPTION

<b>Species Reactivity</b>	Human
<b>Specificity</b>	Detects human LAIR1 in direct ELISAs and Western blots. In direct ELISAs and Western blots, no cross-reactivity with recombinant human LAIR2 or recombinant mouse LAIR1 is observed.
<b>Source</b>	Monoclonal Mouse IgG <sub>2B</sub> Clone # 342219
<b>Purification</b>	Protein A or G purified from hybridoma culture supernatant
<b>Immunogen</b>	Mouse myeloma cell line NS0-derived recombinant human LAIR1 isoform 1 Gln22-His163 Accession # Q6GTX8
<b>Conjugate</b>	Phycoerythrin Excitation Wavelength: 488 nm Emission Wavelength: 565-605 nm
<b>Formulation</b>	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details.  *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

## APPLICATIONS

**Please Note:** Optimal dilutions should be determined by each laboratory for each application. *General Protocols* are available in the *Technical Information* section on our website.

	<b>Recommended Concentration</b>	<b>Sample</b>
<b>Flow Cytometry</b>	10 $\mu$ L/10 <sup>6</sup> cells	See Below

## DATA

## PREPARATION AND STORAGE

<b>Shipping</b>	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
<b>Stability &amp; Storage</b>	<b>Protect from light. Do not freeze.</b> <ul style="list-style-type: none"> <li>12 months from date of receipt, 2 to 8 °C as supplied.</li> </ul>

## BACKGROUND

Leukocyte-associated Ig-like receptor-1 (LAIR1; also CD305) is a 46 kDa inhibitory receptor belonging to the Ig superfamily. It is a type I transmembrane protein with one extracellular Ig-like domain and two cytoplasmic ITIMs. Four LAIR-1 splice variants exist. LAIR1b has a 17 aa deletion outside the Ig loop in the extracellular domain. It differs from LAIR1c by one aa residue. LAIR1d has a 77 aa truncation in the cytoplasmic domain. LAIR1 is expressed on NK cells, T cells, B cells, monocytes, dendritic cells and most thymocytes. The extracellular domain of human LAIR1 shares 40% aa identity with that of the mouse protein.
