

## Human/Mouse/Rat B-Raf Alexa Fluor® 700-conjugated

Monoclonal Mouse IgG<sub>2A</sub> Clone # 336016

Catalog Number: FAB3424N

100 µg

DESCRIPTION					
Species Reactivity	Human/Mouse/Rat				
Specificity	Detects human, mouse, and rat B-Raf . No cross-reactivity with recombinant human Raf-1 is observed. Cross-reactivity with A-Raf has not been tested.				
Source Monoclonal Mouse IgG <sub>2A</sub> Clone # 336016					
Purification Protein A or G purified from hybridoma culture supernatant					
Immunogen	E. coli-derived recombinant human B-Raf Met1-His766 Accession # P15056				
Conjugate	Alexa Fluor 700 Excitation Wavelength: 675-700 nm Emission Wavelength: 723 nm				
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide				
	*Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.				

## **APPLICATIONS**

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

Western Blot Optimal dilution of this antibody should be experimentally determined

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.			
Stability & Storage	pe Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied			

## **BACKGROUND**

The Raf serine/threonine kinases are effectors of Ras that function as MAP3Ks in the ERK phosphorylation cascade. Mammals express three Raf proteins: Raf-1 (C-Raf); A-Raf; and B-Raf, strongly expressed in fetal brain and adult cerebrum. Mice with a targeted disruption of the B-raf gene die of vascular defects during mid-gestation. B-raf mutations have been found in two-thirds of malignant melanomas, with the single substitution V599E in the kinase domain the most frequent

## PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
