

DESCRIPTION

Species Reactivity	Human
Specificity	Detects human MIG2 in direct ELISAs and Western blots. In direct ELISAs, no cross-reactivity with recombinant human (rh) MIG, rhFERMT1 (aa 514-677), rhMIG2/FERMT2 (aa 514-680), or rhFERMT3 (498-667) is observed.
Source	Monoclonal Mouse IgG _{2B} Clone # 696906
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	<i>E. coli</i> -derived recombinant human MIG2 Gln321-Leu444 Accession # Q96AC1
Conjugate	Alexa Fluor 750 Excitation Wavelength: 749 nm Emission Wavelength: 775 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Western Blot Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

MIG2 (mitogen-inducible gene-2), also known as FERMT2 or Kindlin-2, is an approximately 80 kDa, 680 amino acid (aa), ubiquitously expressed member of the Fermitin/Kindlin family of cytoplasmic adaptor proteins. MIG2 is essential for β1 and β3 integrin activity due to its interactions with regulatory molecules such as talin and ILK. MIG2 contains two FERM domains (aa 285-326 and aa 524-573) and one pleckstrin homology domain (aa 373-478). Within the region used as an immunogen, human MIG2 shares 98% aa identity with mouse and rat MIG2. Two isoforms (687 aa and 633 aa) have a 7 aa insert after aa 534. The shorter isoform also has a 2 aa substitution for the C-terminal 57 aa of the 680 aa form.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
