

DESCRIPTION

Species Reactivity	Human
Specificity	Detects human Cerebellin-2 in direct ELISAs. In direct ELISAs, 100% cross-reactivity with recombinant human (rh) Cerebellin-1 and rhCerebellin-4 is observed, and approximately 50% cross-reactivity with rhCerebellin-3 is observed.
Source	Monoclonal Mouse IgG ₁ Clone # 704323
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	Chinese hamster ovary cell line CHO-derived recombinant human Cerebellin-2 Arg50-Leu224 Accession # Q8IUK8
Conjugate	Alexa Fluor 488 Excitation Wavelength: 488 nm Emission Wavelength: 515-545 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Immunohistochemistry Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

Cerebellin-2 (CBLN2) is an approximately 25 kDa glycoprotein in the Cerebellin family of C1q- and TNF-related proteins. It contains a potential membrane-associating segment but may also be secreted. It contains one C1q-like domain in its extracellular region. Cerebellin-2 expression is developmentally regulated in the cerebellum, neocortex, sensory neurons of the dorsal root ganglion and spinal cord, and adrenal cortex. It associates with Cerebellin-1 which is involved in the formation and maintenance of synapses in the cerebellum. Within the ectodomain (aa 50-224), Human Cerebellin-2 shares 99% aa sequence identity with mouse and rat Cerebellin-2.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
