

DESCRIPTION

Species Reactivity	Human/Mouse/Rat
Specificity	Detects Human/Mouse/Rat PSMA2 in direct ELISAs and Western blots.
Source	Monoclonal Mouse IgG _{2B} Clone # 797016
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	<i>E. coli</i> -derived recombinant human PSMA2 Met1-Ala234 Accession # P25787
Conjugate	Alexa Fluor 532 Excitation Wavelength: 534 nm Emission Wavelength: 553 nm
Formulation	Supplied 0.2mg/ml in 1X PBS with RDF1 and 0.09% Sodium Azide *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Western Blot Optimal dilution of this antibody should be experimentally determined.

PREPARATION AND STORAGE

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	Protect from light. Do not freeze. 12 months from date of receipt, 2 to 8 °C as supplied

BACKGROUND

PSMA2 (Proteasome subunit alpha type 2; also known as proteasome component C3 and Macropain subunit C3) is an intracellular 25-27 kDa member of the peptidase T1A family of molecules. It is ubiquitously expressed, and participates in the formation of the 700 kDa 20S proteasomal complex. This complex contains four stacked rings, forming a barrel. The top and bottom rings are made of seven α -subunits, while the two central rings are composed of seven catalytic β -subunits. The complex degrades 80-90% of all intracellular proteins through both an ubiquitin-dependent and -independent process. PSMA2 may modulate the activity of select β -subunits. Human PSMA2 is 234 amino acids (aa) in length. It contains at least five utilized phosphorylation sites plus one nitrated tyrosine. Full-length human PSMA2 shares 99% aa sequence identity with mouse PSMA2.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc., and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
