

## DESCRIPTION

<b>Species Reactivity</b>	Mouse
<b>Specificity</b>	Detects mouse cells expressing the CD45.1 allotype in flow cytometry. Clone A20 does not detect the mouse CD45.2 alloantigen.
<b>Source</b>	Monoclonal Mouse IgG <sub>2A</sub> Clone # A20
<b>Purification</b>	Protein A or G purified from hybridoma culture supernatant
<b>Immunogen</b>	SJL mouse thymocytes and splenocytes
<b>Conjugate</b>	Allophycocyanin Excitation Wavelength: 620-650 nm Emission Wavelength: 660-670 nm
<b>Formulation</b>	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details.  *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

## APPLICATIONS

**Please Note:** Optimal dilutions should be determined by each laboratory for each application. *General Protocols* are available in the *Technical Information* section on our website.

	<b>Recommended Concentration</b>	<b>Sample</b>
<b>Flow Cytometry</b>	10 µL/10 <sup>6</sup> cells	See Below

## DATA

## PREPARATION AND STORAGE

<b>Shipping</b>	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
<b>Stability &amp; Storage</b>	<b>Protect from light. Do not freeze.</b> ● 12 months from date of receipt, 2 to 8 °C as supplied.

## BACKGROUND

CD45, previously called LCA (Leukocyte Common Antigen), T200, or Ly5 in mice, is member C of the Class 1 (Receptor-like) Protein Tyrosine Phosphatase family (PTPRC) (1, 2). It is a variably glycosylated 180-220 kDa transmembrane protein that is abundantly expressed on all nucleated cells of hematopoietic origin (1-3). CD45.1 is an alloantigen of CD45, expressed by Ly5.1 bearing mouse strains (RIII, SJL/J, STS/A, DA).
