

Human Reduced Folate Carrier/SLC19A1 Alexa Fluor® 750-conjugated Antibody

Monoclonal Mouse IgG_{2A} Clone # 890513

Catalog Number: FAB8450S

DESCRIPTION				
Species Reactivity	y Human			
Specificity	Stains human Reduced Folate Carrier/SLC19A1 transfectants but not irrelevant transfectants in flow cytometry.			
Source	Monoclonal Mouse IgG _{2A} Clone # 890513			
Purification	Protein A or G purified from hybridoma culture supernatant			
Immunogen	NS0 mouse myeloma cell line transfected with human Reduced Folate Carrier/SLC19A1 Met1-Gln591 Accession # P41440			
Conjugate	Alexa Fluor 750 Excitation Wavelength: 749 nm Emission Wavelength: 775 nm			
Formulation	Supplied 0.2 mg/mL in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.			

ALL LIGATIONS				
Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.				
	Recommended Concentration	Sample		
Flow Cytometry	0.25-1 μg/10 ⁶ cells	HEK293 human embryonic kidney cell line transfected with human Reduced Folate Carrier/SLC19A1 and eGFP		

PREPARATION AND STORAGE			
Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.		
Stability & Storage	Protect from light. Do not freeze.		
	 12 months from date of receipt, 2 to 8 °C as supplied. 		

BACKGROUND

APPLICATIONS

SLC19A1, also known as, Reduced Folate Carriers, is a transmembrane transporter that is involved in the regulation of intracellular concentrations of folate. There is an association between idiopathic recurrent spontaneous abortion (RSA) and 3 SLC19A1 polymorphisms that may be useful biomarkers for RSA risk. Three transcript variants encoding different isoforms have been found for this gene.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
