

DESCRIPTION

| | |
|---------------------|--|
| Specificity | Selected for use as mouse IgG _{2A} isotype control for flow cytometry applications. |
| Source | Monoclonal Mouse IgG _{2A} Clone # 20102 |
| Purification | Protein A or G purified from hybridoma culture supernatant |
| Immunogen | KLH |
| Conjugate | Biotin Excitation Wavelength: N/A nm Emission Wavelength: N/A nm |
| Formulation | Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions. |

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. [General Protocols](#) are available in the Technical Information section on our website.

Negative control for use in conjunction with R&D Systems biotin-conjugated monoclonal antibodies. The recommended concentration is 10 µL/10⁶ cells.

PREPARATION AND STORAGE

Shipping The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.

Stability & Storage **Do not freeze.**

- 12 months from date of receipt, 2 to 8 °C as supplied.
