Human c-Myc Alexa Fluor® 647-conjugated Antibody

Monoclonal Mouse IgG_1 Clone # 9E10

Catalog Number: IC3696R
100 TESTS

DESCRIPTION

Species Reactivity	Human
Specificity	Detects endogenous human c-Myc and c-Myc tagged proteins in Western blots.
Source	Monoclonal Mouse IgG_1 Clone # 9E10
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	C-terminal region peptide of human c-Myc Ala408-Ala439 Accession # P01106
Conjugate	Alexa Fluor 647 Excitation Wavelength: 650 nm Emission Wavelength: 668 nm
Formulation	Supplied in a saline solution containing BSA and Sodium Azide. See Certificate of Analysis for details. *Contains <0.1% Sodium Azide, which is not hazardous at this concentration according to GHS classifications. Refer to the Safety Data Sheet (SDS) for additional information and handling instructions.

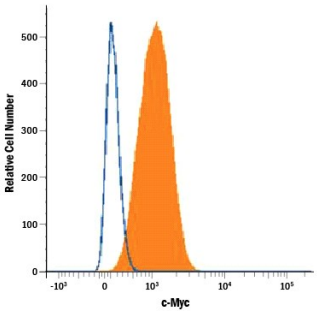
APPLICATIONS

Please Note: *Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.*

	Recommended Concentration	Sample
Intracellular Staining by Flow Cytometry	5 µL/10^6 cells	See Below

DATA

Intracellular Staining by Flow Cytometry



Detection of c-Myc in Jurkat Human Cell Line by Flow Cytometry. Jurkat human acute T cell leukemia cell line was stained with Mouse Anti-Human c-Myc Alexa Fluor® 647-conjugated Monoclonal Antibody (Catalog # IC3696R, filled histogram) or isotype control antibody (Catalog # IC002R, open histogram). To facilitate intracellular staining, cells were fixed with Flow Cytometry Fixation Buffer (Catalog # FC004) and permeabilized with methanol. View our protocol for Staining Intracellular Molecules.

PREPARATION AND STORAGE

Shipping	The product is shipped with polar packs. Upon receipt, store it immediately at the temperature recommended below.
Stability & Storage	**Protect from light. Do not freeze.** ● 12 months from date of receipt, 2 to 8 °C as supplied.

BACKGROUND

Human c-Myc is a helix-loop-helix transcription factor which efficiently binds DNA after heterodimerization with the bHLH protein Max. It is often overexpressed and mutated in hematopoietic tumors. Mutations frequently result in truncation around amino acid (aa) 252, before the C-terminal DNA binding, HLH, and leucine zipper domains. The 439 aa human c-Myc has one potential O-glycosylation site plus three Ser/Thr phosphorylation sites near the N-terminus. Human c-Myc shares 92% aa identity with mouse and rat c-Myc.

PRODUCT SPECIFIC NOTICES

This product is provided under an agreement between Life Technologies Corporation and R&D Systems, Inc, and the manufacture, use, sale or import of this product is subject to one or more US patents and corresponding non-US equivalents, owned by Life Technologies Corporation and its affiliates. The purchase of this product conveys to the buyer the non-transferable right to use the purchased amount of the product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The sale of this product is expressly conditioned on the buyer not using the product or its components (1) in manufacturing; (2) to provide a service, information, or data to an unaffiliated third party for payment; (3) for therapeutic, diagnostic or prophylactic purposes; (4) to resell, sell, or otherwise transfer this product or its components to any third party, or for any other commercial purpose. Life Technologies Corporation will not assert a claim against the buyer of the infringement of the above patents based on the manufacture, use or sale of a commercial product developed in research by the buyer in which this product or its components was employed, provided that neither this product nor any of its components was used in the manufacture of such product. For information on purchasing a license to this product for purposes other than research, contact Life Technologies Corporation, Cell Analysis Business Unit, Business Development, 29851 Willow Creek Road, Eugene, OR 97402, Tel: (541) 465-8300. Fax: (541) 335-0354.
