PRODUCT DESCRIPTION

The 96-well Magnetic Plate Separator is intended to be used to separate out magnetic microparticles in a 96-well plate. There are 2 clasps to secure a 96-well plate to the magnetic plate separator allowing the liquid well contents to be expelled while the magnetic microparticles are secured to the bottom of the plate.

INTENDED USE

This plate is designed for use with the commonly used, ELISA manual plate washing technique.

STORAGE

Store at room temperature.

PRECAUTION

Exercise caution when using this Magnetic Plate Separator as it contains strong rare earth magnets and it should be handled with care. Keep this magnet away from electronic devices and persons with cardiac pacemakers.
