Human CCR7 Antibody

Monoclonal Mouse IgG_{2A} Clone # 150503

Catalog Number: MAB197

DESCRIPTION

Species Reactivity	Human
Specificity	Detects human CCR7.
Source	Monoclonal Mouse IgG_{2A} Clone # 150503
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	Human CCR7 transfectants Met1-Pro378 Accession # AAA58615
Endotoxin Level	<0.10 EU per 1 µg of the antibody by the LAL method.
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS with Trehalose. See Certificate of Analysis for details. *Small pack size (-SP) is supplied either lyophilized or as a 0.2 µm filtered solution in PBS.

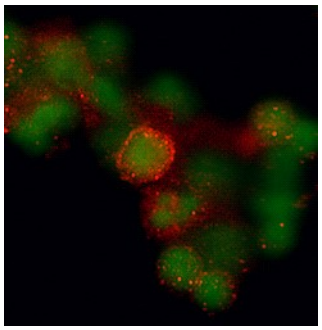
APPLICATIONS

Please Note: *Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.*

	Recommended Concentration	Sample
Flow Cytometry	0.25 µg/10^6 cells	See Below
Immunocytochemistry	8-25 µg/mL	See Below
CyTOF-reported	Mei, H.E. *et al.* (2015) J. Immunol. **194**: 2022. Ready to be labeled using established conjugation methods. No BSA or other carrier proteins that could interfere with conjugation.	
Neutralization	Measured by its ability to neutralize CCL19/MIP-3β-induced chemotaxis in the BaF3 mouse pro-B cell line transfected with human CCR7. The Neutralization Dose (ND_{50}) is typically 1-5 µg/mL in the presence of 50 ng/mL Recombinant Human CCL19/MIP-3β.	

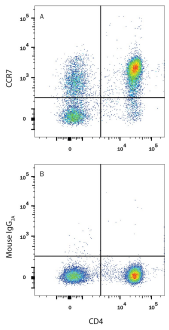
DATA

Immunocytochemistry



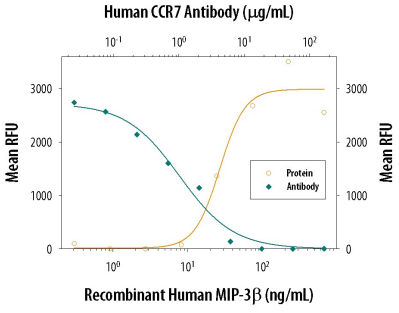
CCR7 in Human PBMCs. CCR7 was detected in immersion fixed human peripheral blood mononuclear cells (PBMCs) using 25 µg/mL Mouse Anti-Human CCR7 Monoclonal Antibody (Catalog # MAB197) for 3 hours at room temperature. Cells were stained (red) and counterstained (green). View our protocol for Fluorescent ICC Staining of Non-adherent Cells.

Flow Cytometry



Detection of CCR7 in Human PBMCs by Flow Cytometry. Human peripheral blood mononuclear cells (PBMCs) were stained with Mouse Anti-Human CD4 PE-conjugated Monoclonal Antibody (Catalog # FAB3791P) and either (A) Mouse Anti-Human CCR7 Monoclonal Antibody (Catalog # MAB197) or (B) Mouse IgG_{2A} Isotype Control (Catalog # MAB003) followed by Allophycocyanin-conjugated Anti-Mouse IgG Secondary Antibody (Catalog # F0101B). View our protocol for Staining Membrane-associated Proteins.

Neutralization



Chemotaxis Induced by CCL19/MIP-3β and Neutralization by Human CCR7 Antibody. Recombinant Human CCL19/MIP-3β (Catalog # 361-MI) chemoattracts the BaF3 mouse pro-B cell line transfected with human CCR7 in a dose-dependent manner (orange line). The amount of cells that migrated through to the lower chemotaxis chamber was measured by Resazurin (Catalog # AR002). Chemotaxis elicited by Recombinant Human CCL19/MIP-3β (50 ng/mL) is neutralized (green line) by increasing concentrations of Mouse Anti-Human CCR7 Monoclonal Antibody (Catalog # MAB197). The ND_{50} is typically 1-5 µg/mL.

Human CCR7 Antibody

Monoclonal Mouse IgG_{2A} Clone # 150503

Catalog Number: MAB197

PREPARATION AND STORAGE

Reconstitution	Reconstitute at 0.5 mg/mL in sterile PBS.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below. *Small pack size (-SP) is shipped with polar packs. Upon receipt, store it immediately at -20 to -70 °C
Stability & Storage	**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.** ● 12 months from date of receipt, -20 to -70 °C as supplied. ● 1 month, 2 to 8 °C under sterile conditions after reconstitution. ● 6 months, -20 to -70 °C under sterile conditions after reconstitution.

BACKGROUND

CCR7 is a 7 transmembrane G protein coupled chemokine receptor. CCR7 is expressed on T cells and mature dendritic cells and transduces chemotactic signals in response to CCL19 and CCL21. Human CCR7 shares 87% amino acid sequence identity with mouse CCR7.
