

## **Human Complement Factor H Antibody**

Monoclonal Mouse IgG<sub>1</sub> Clone # 556317 Catalog Number: MAB4779

| DESCRIPTION        |  |
|--------------------|--|
| Species Reactivity | Human  |
| Specificity        | Detects human Complement Factor H in direct ELISAs and Western blots.  |
| Source             | Monoclonal Mouse IgG <sub>1</sub> Clone # 556317   |
| Purification       | Protein A or G purified from hybridoma culture supernatant   |
| Immunogen          | Mouse myeloma cell line NS0-derived recombinant human Complement Factor H Ser860-Arg1231 Accession # P08603  |
| Formulation        | Lyophilized from a 0.2 µm filtered solution in PBS with Trehalose. See Certificate of Analysis for details. *Small pack size (-SP) is supplied either lyophilized or as a 0.2 µm filtered solution in PBS. |

## APPLICATIONS

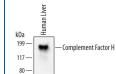

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

|                     | Recommended<br>Concentration | Sample   |
|---------------------|------------------------------|--|
| Western Blot        | 2 μg/mL                      | See Below  |
| Immunoprecipitation | 25 μg/mL                     | Conditioned cell culture medium spiked with Recombinant<br>Human Complement Factor H, see our available<br>Western blot detection antibodies |

## DATA

Western Blot

Detection of Human Complement Factor H by Western Blot. Western blot shows lysates of human liver tissue. PVDF Membrane was probed with 2 µg/mL of Human Complement Factor H Monoclonal Antibody (Catalog # MAB4779) followed by HRP-conjugated Anti-Mouse IgG Secondary Antibody (Catalog # Catalog # HAF007). A specific band was detected for Complement Factor H at approximately 155 kDa (as indicated). This experiment was conducted under non-reducing conditions and using Immunoblot Buffer Group 1.

Reconstitution Reconstitute at 0.5 mg/mL in sterile PBS.

Shipping The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

 $^*$ Small pack size (-SP) is shipped with polar packs. Upon receipt, store it immediately at -20 to -70  $^\circ$ C

- 12 months from date of receipt, -20 to -70 °C as supplied
- 1 month, 2 to 8 °C under sterile conditions after reconstitution.
- 6 months, -20 to -70 °C under sterile conditions after reconstitution.

## BACKGROUND

Complement Factor H (CFH) is a 155 kDa glycoprotein that negatively regulates the alternative pathway complement cascade. It is secreted by Kupffer cells, hepatocytes, vascular endothelial cells, and platelets and circulates in the serum at high concentration. CFH interacts with cell surface polyanions and prevents local complement activation by sequestering complement component C3b, accelerating the decay of C3 and C5, and functioning as a cofactor for Factor I. CFH is composed of 20 SCR (short consensus repeats). Alternate splicing generates an isoform that is truncated following SCR7. Within SCR5-20 (aa 260-1231), human CFH shares 60% and 62% aa sequence identity with mouse and rat CFH, respectively.
