

# **Human Melanocortin-5 R/MC5R Antibody**

Monoclonal Mouse IgG<sub>2A</sub> Clone # 821012 Catalog Number: MAB8205

| DESCRIPTION        |   |  |  |
|--------------------|---|--|--|
| Species Reactivity | Human   |  |  |
| Specificity        | Stains human Melanocortin-5 R/MC5R transfected cells but not irrelevant transfectants in flow cytometry.  |  |  |
| Source             | Monoclonal Mouse IgG <sub>2A</sub> Clone # 821012   |  |  |
| Purification       | Protein A or G purified from hybridoma culture supernatant  |  |  |
| Immunogen          | NS0 mouse myeloma cell line transfected with human Melanocortin-5 R/MC5R<br>Met1-Asp325<br>Accession # P33032   |  |  |
| Formulation        | Lyophilized from a 0.2 μm filtered solution in PBS with Trehalose. See Certificate of Analysis for details.<br>*Small pack size (-SP) is supplied either lyophilized or as a 0.2 μm filtered solution in PBS. |  |  |

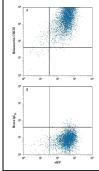

#### **APPLICATIONS**

Please Note: Optimal dilutions should be determined by each laboratory for each application. General Protocols are available in the Technical Information section on our website.

|                | Recommended<br>Concentration            | Sample  |
|----------------|---|---|
| Flow Cytometry | $2.5~\mu g/10^6~cells$                  | See Below   |
| CyTOF-ready    | Ready to be labeled u with conjugation. | sing established conjugation methods. No BSA or other carrier proteins that could interfere |

#### DATA

### Flow Cytometry

Detection of Melanocortin-5 R/MC5R in HEK293 Human Cell Line Transfected with Human Melanocortin-5 R/MC5R and eGFP by Flow Cytometry. HEK293 human embryonic kidney cell line transfected with human Melanocortin-5 R/MC5R and eGFP was stained with and either (A) Mouse Anti-Human Melanocortin-5 R/MC5R Monoclonal Antibody (Catalog # MAB8205) or (B) Mouse IgG<sub>2A</sub> Isotype Control (Catalog # MAB003) followed by Allophycocyanin-conjugated Anti-Mouse IgG Secondary Antibody (Catalog # F0101B).

## PREPARATION AND STORAGE

Reconstitution Reconstitute at 0.5 mg/mL in sterile PBS.

Shipping The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

\*Small pack size (-SP) is shipped with polar packs. Upon receipt, store it immediately at -20 to -70 °C

## Stability & Storage Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

- 12 months from date of receipt, -20 to -70 °C as supplied.
- 1 month, 2 to 8 °C under sterile conditions after reconstitution.
- 6 months, -20 to -70 °C under sterile conditions after reconstitution.

### BACKGROUND

Melanocortin 5R (MC5R) is a member of the melanocortin receptor family. The 325 amino acid G-protein-coupled 7-transmembrane glycoprotein is expressed in skeletal muscle, where engagement by a-melanocyte stimulating hormone increases glucose uptake and stimulates a thermogenic response. Expression is also found in sebaceous glands and other skin structures, and on selected hematopoietic cell lines. Human MC5R shares 80-81% amino acid sequence identity with mouse and rat MC5R.
