

DESCRIPTION

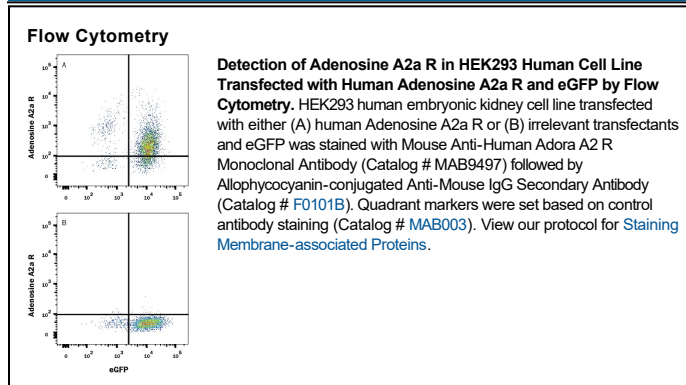

Species Reactivity	Human
Specificity	Detects human Adenosine A2a R in direct ELISAs.
Source	Monoclonal Mouse IgG _{2A} Clone # 599717
Purification	Protein A or G purified from hybridoma culture supernatant
Immunogen	NS0 mouse myeloma cell line transfected with human Adenosine A2a R Met1-Ser412 Accession # P29274
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS with Trehalose. See Certificate of Analysis for details. *Small pack size (-SP) is supplied either lyophilized or as a 0.2 µm filtered solution in PBS.

APPLICATIONS

Please Note: Optimal dilutions should be determined by each laboratory for each application. *General Protocols* are available in the *Technical Information* section on our website.

	Recommended Concentration	Sample
Flow Cytometry	0.25 µg/10 ⁶ cells	See Below

DATA

PREPARATION AND STORAGE

Reconstitution	Reconstitute at 0.5 mg/mL in sterile PBS.
Shipping	The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below. *Small pack size (-SP) is shipped with polar packs. Upon receipt, store it immediately at -20 to -70 °C
Stability & Storage	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. <ul style="list-style-type: none"> ● 12 months from date of receipt, -20 to -70 °C as supplied. ● 1 month, 2 to 8 °C under sterile conditions after reconstitution. ● 6 months, -20 to -70 °C under sterile conditions after reconstitution.

BACKGROUND

ADORA-A2 (Adenosine A2a Receptor) is a widely expressed seven transmembrane G protein-coupled receptor. Activation by adenosine leads to increased intracellular cAMP levels. ADORA-2A mediates many biological functions, including cardiac rhythm and circulation, cerebral and renal blood flow, immune function, pain regulation, and sleep. ADORA-A2 has been identified as a target for therapeutic drugs for inflammation, cancer, ischemic reperfusion injury, diabetic nephropathy, infectious diseases and neuronal disorders.
