Product Name: NBQX disodium salt Catalog No.: 1044 Batch No.: 42

CAS Number: 479347-86-9

IUPAC Name: 2,3-Dioxo-6-nitro-1,2,3,4-tetrahydrobenzo[f]quinoxaline-7-sulfonamide disodium salt

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: $C_{12}H_6N_4O_6SNa_2.2\frac{1}{2}H_2O$

Batch Molecular Weight: 425.28

Physical Appearance: Dark brown solid
Solubility: water to 100 mM
Storage: Store at -20°C

Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 98.8% purity

¹H NMR: Consistent with structure

Mass Spectrum: Consistent with structure

Microanalysis: Carbon Hydrogen Nitrogen

Theoretical 33.89 2.61 13.17 Found 33.65 2.39 12.69

Product Information

Print Date: Feb 25th 2025

www.tocris.com

Product Name: NBQX disodium salt Catalog No.: 1044 Batch No.: 42

CAS Number: 479347-86-9

IUPAC Name: 2,3-Dioxo-6-nitro-1,2,3,4-tetrahydrobenzo[f]quinoxaline-7-sulfonamide disodium salt

Description:

NBQX disodium salt is a selective and competitive AMPA and kainate receptor antagonist (IC $_{50}$ = 0.15 μM and 4.8 μM , respectively). NBQX blocks the antidepressant effects of 8-Hydroxy-DPAT hydrobromide (Cat. No. 0529), decreases mTOR and BDNF levels. NBQX is neuroprotective, anticonvulsant, antinociceptive and active in vivo. NBQX disodium salt is a more water-soluble form of NBQX (Cat. No. 0373).

Physical and Chemical Properties:

Batch Molecular Formula: C₁₂H₆N₄O₆SNa₂.2½H₂O

Batch Molecular Weight: 425.28

Physical Appearance: Dark brown solid

Minimum Purity: ≥98%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

water to 100 mM

This compound is hygroscopic and may absorb atmospheric moisture during prolonged storage, causing it to take on an orange to red colouration. The solid may also become sticky and/or collapse into a gel or glass-like form. Although purity is unaffected, it may be difficult to extract the full quantity from the vial. In such a situation, we recommend that solutions are made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved. When purchased as a 1mg unit, it is supplied in lyophilized form and may be very hard to visualize.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
