

Product Name: Dibutyryl-cAMP, sodium salt

Catalog No.: 1141

Batch No.: 37

CAS Number: 16980-89-5

EC Number: 241-059-4

IUPAC Name: *N*⁶,*O*²-Dibutyryl adenosine 3',5'-cyclic monophosphate sodium salt

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₈H₂₃N₅NaO₈P.1½H₂O

Batch Molecular Weight: 518.39

Physical Appearance: White solid

Solubility: water to 100 mM
DMSO to 100 mM

Storage: Store at -20°C

Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 98.2% purity

¹H NMR: Consistent with structure

Mass Spectrum: Consistent with structure

Microanalysis:

	Carbon	Hydrogen	Nitrogen
Theoretical	41.71	5.06	13.51
Found	41.12	4.96	13.36

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Dibutyryl-cAMP, sodium salt

Catalog No.: 1141

37

CAS Number: 16980-89-5

EC Number: 241-059-4

IUPAC Name: N⁶,O²-Dibutyryl adenosine 3',5'-cyclic monophosphate sodium salt

Description:

Dibutyryl-cAMP sodium salt is a cell-permeable analog of cAMP that activates cAMP-dependent protein kinases and is a phosphodiesterase inhibitor. Combined with other reagents, dibutyryl-cAMP promotes differentiation of neural stem/progenitor cells (NSPCs) and other cell lines and increases survival rates of NSPCs and differentiation into neurons in vivo. Promotes neurite outgrowth in cell cultures. Dibutyryl-cAMP has anti-inflammatory activity and is used to promote wound healing. Choline acetyltransferase and vesicular acetylcholine transporter mRNA are increased in cells treated with dibutyryl-cAMP.

Physical and Chemical Properties:

Batch Molecular Formula: C₁₈H₂₃N₅NaO₈P.1½H₂O

Batch Molecular Weight: 518.39

Physical Appearance: White solid

Minimum Purity: ≥98%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

water to 100 mM

DMSO to 100 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
