1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: \( C_{115}H_{160}O_{32}N_{26}S_{4} \)
Batch Molecular Weight: 2547
Physical Appearance: White lyophilised solid
Net Peptide Content: 82%
Counter I on: Ammonium acetate
Solubility: Soluble to 1 mg/ml in DMSO
Storage: Desiccate at -20°C
Peptide Sequence:

\[
\text{Cys-Scr-Cys-Scr-Scr-Trp-Leu-Asp-Lys-Clu-}
\text{Cys-Val-Tyr-Phe-Cys-His-Leu-Asp-Ile-Ile-Trp}
\]

2. ANALYTICAL DATA

HPLC: Shows 97.7% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use
Product Name: Endothelin 2 (human)  
CAS Number: 123562-20-9

**Description:**  
Endogenous peptide found predominately in the kidney and intestine. Displays similar selectivity for ET<sub>A</sub> and ET<sub>B</sub> endothelin receptors.

**Physical and Chemical Properties:**  
Batch Molecular Formula: C<sub>115</sub>H<sub>160</sub>O<sub>32</sub>N<sub>26</sub>S<sub>4</sub>  
Batch Molecular Weight: 2547  
Physical Appearance: White lyophilised solid

**Peptide Sequence:**  

**Storage:** Desiccate at -20°C

**Solubility & Usage Info:**  
Soluble to 1 mg/ml in DMSO  
This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

**Net Peptide Content:** 82% (Remaining weight made up of counterions and residual water).

**Counter Ion:** Ammonium acetate

**Stability and Solubility Advice:**  
Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).  
Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met, Trp, Asn, Gln, and N-terminal Glu.  
Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.  
Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μm filter to remove potential bacterial contamination whenever possible.
