TOCRIS a biotechne brand

Print Date: May 16th 2022

Certificate of Analysis

www.tocris.com

Catalog No.: 1193 Batch No.: 12

Product Name: Melittin CAS Number: 20449-79-0

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula:	$C_{131}H_{229}N_{39}O_{31}$
Batch Molecular Weight:	2847
Physical Appearance:	Off White lyophilised solid
Counter Ion:	TFA
Solubility:	Soluble to 1 mg/ml in water
Storage:	Store at -20°C
Peptide Sequence:	Gly-IIe-Gly-Ala-Val-Leu-Lys-Val-Leu- Thr-Thr-Gly-Leu-Pro-Ala-Leu-IIe-Ser- Trp-IIe-Lys-Arg-Lys-Arg-Gln-Gln-NH ₂

2. ANALYTICAL DATA

HPLC:	Shows 96.3% purity
Mass Spectrum:	Consistent with structure

3. AMINO ACID ANALYSIS DATA

Product Name: Melittin

CAS Number: 20449-79-0

Description:

Melittin is a inhibits G_s and stimulates G_i activity. Inhibits protein kinase C and cAMP-dependent protein kinases. Na⁺/K⁺ ATPase inhibitor.

Physical and Chemical Properties:

Batch Molecular Formula: C₁₃₁H₂₂₉N₃₉O₃₁ Batch Molecular Weight: 2847 Physical Appearance: Off White Iyophilised solid

Peptide Sequence:

Gly-IIe-Gly-Ala-Val-Leu-Lys-Val-Leu-Thr-Thr-Gly-Leu-Pro-Ala-Leu-IIe-Ser-Trp-IIe-Lys-Arg-Lys-Arg-Gln-Gln-NH₂

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45-60^{\circ}C$ water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met,Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μ m filter to remove potential bacterial contamination whenever possible.
