Description:

ARL 67156 trisodium salt is a selective NTPDase inhibitor ($pI_{C_{50}}$ = 4.62 and 5.1 in human blood and rat vas deferens respectively). ARL 67156 prevents vascular calcification and extends longevity in Hutchinson-Gilford progeria syndrome mice. ARL 67156 increases neurogenic contract response to nerve stimulation. ARL 67156 enhances parasympathetic neurotransmission in guinea-pig urinary bladder.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
