Description:

GW 5074 is a potent, selective and cell-permeable c-Raf1 kinase inhibitor ($IC_{50} = 9$ nM). GW 5074 displays ≥ 100 -fold selectivity for raf kinase over CDK1, CDK2, c-src, ERK2, MEK, p38, Tie2, VEGFR2 and c-fm. GW 5074 binds mutant huntingtin (mHTT) and decreases levels of mHTT in cultured hippocampal neurons and fibroblasts from patients with Huntington's disease. Brain penetrant.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a $45-60^{\circ}C$ water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at $-20^{\circ}C$ or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
