Product Name: Ruthenium Red

Catalog No.: 1439

Batch No.: 5

CAS Number: 11103-72-3

IUPAC Name: Ammoniated ruthenium oxychloride

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: $H_{42}N_{14}O_2Ru_3Cl_6$

Batch Molecular Weight: 786.35

Physical Appearance: solid

Solubility: water to 10 mM

Storage: Store at RT

Batch Molecular Structure: $[(NH_3)_5RuORu(NH_3)_4ORu(NH_3)_5]^{6+} 6Cl^-$

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Ruthenium Red

Catalog No.: 1439

5

CAS Number: 11103-72-3

IUPAC Name: Ammoniated ruthenium oxychloride

Description:

Ruthenium Red blocks Ca²⁺ uptake and release from mitochondria, and Ca²⁺ release from ryanodine-sensitive intracellular stores. Also blocks cell membrane-located capsaicin-activated cation channels (IC₅₀ = 14 nM) and voltage-sensitive Ca²⁺ channels to inhibit neurotransmitter release.

Physical and Chemical Properties:

Batch Molecular Formula: H₄₂N₁₄O₂Ru₃Cl₆

Batch Molecular Weight: 786.35

Physical Appearance: solid

Batch Molecular Structure:

Storage: Store at RT

Solubility & Usage Info:

water to 10 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
