Product Name: Orexin B (human)
CAS Number: 205640-91-1

Catalog No.: 1456 **Batch No.:** 20

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₁₂₃H₂₁₂N₄₄O₃₅S
Batch Molecular Weight: 2899.36
Physical Appearance: Off White lyophilised solid
Counter Ion: TFA
Solubility: Soluble to 1 mg/ml in water
Storage: Store at -20°C
Peptide Sequence: Arg-Ser-Gly-Pro-Pro-Gly-Leu-Gln-Gly-Arg-Leu-Gln-Arg-Leu-Leu-Gln-Ala-Ser-Gly-Asn-His-Ala-Ala-Gly-Ile-Leu-Thr-Met-NH₂

2. ANALYTICAL DATA

HPLC: Shows 96.5% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical		Actual		Amino Acid Theoretical		Actual	
Ala	3.00	2.96	Lys				
Arg	3.00	3.01	Met	1.00	1.00		
Asx	1.00	1.03	Phe				
Cys			Pro	2.00	1.98		
Glx	3.00	3.05	Ser	2.00	1.71		
Gly	5.00	5.01	Thr	1.00	0.98		
His	1.00	1.00	Trp				
Ile	1.00	1.00	Tyr				
Leu	5.00	4.96	Val				

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Orexin B (human)

Catalog No.: 1456

20

CAS Number: 205640-91-1

Description:

Orexin B (human) is an endogenous agonist at orexin receptors (K_i values are 420 and 36 nM for OX_1 and OX_2 receptors, respectively). Stimulates feeding following central administration and may be involved in the control of sleep-wake cycle and other hypothalamic functions. Also neuroprotective for dopaminergic neurons in rat midbrain cultures.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{123}H_{212}N_{44}O_{35}S$

Batch Molecular Weight: 2899.36

Physical Appearance: Off White lyophilised solid

Peptide Sequence:

Arg-Ser-Gly-Pro-Pro-Gly-Leu-Gln-Gly-Arg-
Leu-Gln-Arg-Leu-Leu-Gln-Ala-Ser-Gly-Asn-
His-Ala-Ala-Gly-Ile-Leu-Thr-Met-NH₂

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
