17-AAG Product Name:

Catalog No.: 1515

Batch No.: 5

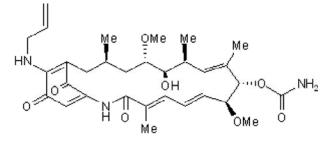

CAS Number: 75747-14-7 **IUPAC Name:** 17-Demethoxy-17-(2-propenylamino)geldanamycin

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: Batch Molecular Weight: Physical Appearance: Solubility: Storage:

Batch Molecular Structure:

 $C_{31}H_{43}N_3O_8$ 585.7 Purple solid DMSO to 10 mM Store at -20°C

2. ANALYTICAL DATA

HPLC: Mass Spectrum:

Shows 98.2% purity Consistent with structure

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

TOCRIS a biotechne brand

Product Name: 17-AAG

Catalog No.: 1515

Batch No.: 5

CAS Number: 75747-14-7 IUPAC Name: 17-Demetho

17-Demethoxy-17-(2-propenylamino)geldanamycin

Description:

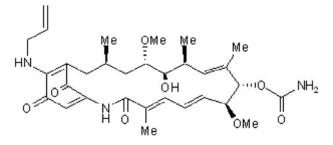

17-AAG is an inhibitor of heat shock protein 90 (Hsp90) chaperone activity, and an analog of geldanamycin (Cat. No. 1368). Subsequently inhibits the activity of oncogenic proteins such as p185^{erbB-2} (IC₅₀ = 31 nM), N-ras, Ki-ras and c-Akt. Antitumor in vivo. Also protects neuroprogenitor cells against stress-induced apoptosis at low concentrations (10 nM) in vitro.

Physical and Chemical Properties:

Batch Molecular Formula: C₃₁H₄₃N₃O₈ Batch Molecular Weight: 585.7 Physical Appearance: Purple solid

Minimum Purity: ≥98%

Batch Molecular Structure:

Storage: Store at -20°C

CAUTION - This product is light sensitive and we recommend that the solid material and any solutions obtained are protected from exposure to light.

Solubility & Usage Info:

DMSO to 10 mM

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
