**Description:**

Highly selective group II mGlu receptor agonist (EC<sub>50</sub> values are 2.69 and 4.48 nM for hmGlu<sub>2</sub> and hmGlu<sub>3</sub> respectively) that displays > 80-fold selectivity over group I and group III receptors. Provides protection against NMDA-mediated cell death in vitro and offers almost complete protection against CA1 hippocampal damage following global ischemia in gerbils. Orally and systemically active. Caged LY 379268 is also available (Cat. No. 3332).

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
