Description:

Brain penetrant, mixed 5-HT_{2A}/5-HT_{2C} receptor agonist (K_i values are 0.7, 2.4 and 20 nM for 5-HT_{2A}, 5-HT_{2C} and 5-HT_{2B} receptors respectively). Reduces rapid eye movement (REM) and slow wave sleep and increases waking in the rat. Hallucinogenic agent. Acts via 5-HT_{2A} receptors to inhibit the inflammatory effects of tumor necrosis factor (TNF)- α .

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
