

Certificate of Analysis

www.tocris.com

Product Name: [Orn⁵]-URP

Catalog No.: 3162

Batch No.: 1

CAS Number: 782485-03-4

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₄₈H₆₂N₁₀O₁₀S₂
Batch Molecular Weight: 1003.2
Physical Appearance: White lyophilised solid
Net Peptide Content: 92.4%
Counter Ion: Trifluoroacetate
Solubility: Soluble to 1 mg/ml in water
Storage: Store at -20°C
Peptide Sequence: Ala-Cys-Phe-Trp-Orn-Tyr-Cys-Val

2. ANALYTICAL DATA

HPLC: Shows >95.3% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical		Actual		Amino Acid Theoretical		Actual	
Ala	1.00	1.00	Lys				
Arg			Met				
Asx			Phe	1.00	1.00		
Cys	2.00	2.00	Pro				
Glx			Ser				
Gly			Thr				
His			Trp	1.00	1.00		
Ile			Tyr	1.00	1.00		
Leu			Val	1.00	1.00

Product Name: [Orn⁵]-URP

Catalog No.: 3162

Batch No.: 1

CAS Number: 782485-03-4

Description:

Urotensin-II (UT) receptor pure antagonist (pEC₅₀ = 7.24). Displays no agonist activity unlike other U-II/URP analogs. Inhibits the action of U-II in the rat aorta ring assay.

Physical and Chemical Properties:

Batch Molecular Formula: C₄₈H₆₂N₁₀O₁₀S₂

Batch Molecular Weight: 1003.2

Physical Appearance: White lyophilised solid

Peptide Sequence:

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 92.4% (Remaining weight made up of counterions and residual water).

Counter Ion: Trifluoroacetate

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
