**Description:**

JZL 184 is a potent and selective MAGL inhibitor. Blocks hydrolysis of the endocannabinoid 2-arachidonyl glycerol (2-AG) in vivo in the mouse brain ( $IC_{50} = 8$  nM). Potentiates depolarization-induced suppression of excitability in cerebellar Purkinje neurons. Exhibits >300-fold selectivity for MAGL over FAAH in vitro. Attenuates nociception in neuropathic and inflammatory pain models. Also reduces free fatty acid levels in primary tumors.

**Storage:** Store at  $-20^{\circ}C$

**Solubility & Usage Info:**

DMSO to 100 mM

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a  $45-60^{\circ}C$  water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at  $-20^{\circ}C$  or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
