

Product Name: Puromycin dihydrochloride

Catalog No.: 4089

Batch No.: 10

CAS Number: 58-58-2

EC Number: 200-387-8

IUPAC Name: 3'-[α -Amino-*p*-methoxyhydrocinnamamido]-3'-deoxy-*N,N*-dimethyladenosine dihydrochloride

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₂₂H₂₉N₇O₅·2HCl·2H₂O

Batch Molecular Weight: 580.46

Physical Appearance: White solid

Solubility: water to 100 mM
DMSO to 100 mM

Storage: Store at -20°C

Batch Molecular Structure:

2. ANALYTICAL DATA

Melting Point: At 180°C

HPLC: Shows 99.1% purity

¹H NMR: Consistent with structure

Mass Spectrum: Consistent with structure

Microanalysis:

	Carbon	Hydrogen	Nitrogen
Theoretical	45.52	6.08	16.89
Found	45.22	6.14	16.57

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Puromycin dihydrochloride

Catalog No.: 4089

Batch No.: 10

CAS Number: 58-58-2

EC Number: 200-387-8

IUPAC Name: 3'-[α -Amino-*p*-methoxyhydrocinnamamido]-3'-deoxy-*N,N*-dimethyladenosine dihydrochloride

Description:

Protein synthesis inhibitor; leads to the premature release of polypeptide chains as polypeptidyl purine derivatives. Analog of the 3' end of aminoacyl-tRNA. Aminonucleoside antibiotic. Inhibits translation in both in vitro and in vivo systems. Also inhibits the transport of proteins into the mitochondria in vitro.

Physical and Chemical Properties:

Batch Molecular Formula: C₂₂H₂₉N₇O₅.2HCl.2H₂O

Batch Molecular Weight: 580.46

Physical Appearance: White solid

Minimum Purity: >98%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

water to 100 mM

DMSO to 100 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
