www.tocris.com

Product Name: TC 14012 Catalog No.: 4300 Batch No.: 9

CAS Number: 368874-34-4

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: $C_{90}H_{140}N_{34}O_{19}S_2$

Batch Molecular Weight: 2066.43

Physical Appearance: White lyophilised solid

Counter Ion: TFA

Solubility: Soluble to 1 mg/ml in water

Storage: Store at -20°C

Peptide Sequence:

Arg-Arg-Nal-Cys-Tyr-Cit-Lys-D-Cit-Pro-Tyr-

Arg-Cit-Cys-Arg-NH₂

2. ANALYTICAL DATA

HPLC: Shows 97.5% purity

Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical Actual			Amino Acid Theoretical Actual		
Ala			Lys	1.00	1.01
Arg	4.00	4.12	Met		
Asx			Phe		
Cys	2.00	Not Detected	Pro	1.00	1.02
Glx			Ser		
Gly			Thr		
His			Trp		
lle			Tyr	2.00	1.96
Leu			Val		

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Information

Print Date: Nov 5th 2024

Product Name: TC 14012 Catalog No.: 4300 9

CAS Number: 368874-34-4

Description:

TC 14012 is a CXCR4 antagonist and ACKR3 (CXCR7) agonist (EC $_{50}$ = 350 nM for CXCR7).

Physical and Chemical Properties:

Batch Molecular Formula: $C_{90}H_{140}N_{34}O_{19}S_2$

Batch Molecular Weight: 2066.43

Physical Appearance: White lyophilised solid

Peptide Sequence:

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met,Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μ m filter to remove potential bacterial contamination whenever possible.
