

Product Name: Purmorphamine

Catalog No.: 4551

Batch No.: 4

CAS Number: 483367-10-8

IUPAC Name: 9-Cyclohexyl-N-[4-(4-morpholinyl)phenyl]-2-(1-naphthalenyloxy)-9H-purin-6-amine

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₃₁H₃₂N₆O₂·¼H₂O
Batch Molecular Weight: 525.12
Physical Appearance: White solid
Solubility: DMSO to 100 mM
Storage: Store at -20°C
Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 98.4% purity
¹H NMR: Consistent with structure
Mass Spectrum: Consistent with structure

Microanalysis:

	Carbon	Hydrogen	Nitrogen
Theoretical	70.9	6.24	16
Found	71.06	6.21	15.79

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Purmorphamine

Catalog No.: 4551

Batch No.: 4

CAS Number: 483367-10-8

IUPAC Name: 9-Cyclohexyl-N-[4-(4-morpholinyl)phenyl]-2-(1-naphthalenyloxy)-9H-purin-6-amine

Description:

Smoothened (Smo) receptor agonist ($EC_{50} \sim 1 \mu\text{M}$). Induces osteogenesis in mouse mesenchymal progenitor cells (C3H10T1/2). When combined with BMP-4, can transdifferentiate pre-adipocytes (3T3-L1) and myoblasts (C2C12) into osteoblasts. Induces differentiation of multipotent mesenchymal progenitor cells into osteoblasts.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{31}H_{32}N_6O_2 \cdot \frac{1}{4}H_2O$

Batch Molecular Weight: 525.12

Physical Appearance: White solid

Minimum Purity: >98%

Batch Molecular Structure:

Storage: Store at -20°C

Solubility & Usage Info:

DMSO to 100 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
