TOCRIS a bio-techne brand

Print Date: Oct 9th 2019

Certificate of Analysis

www.tocris.com

Product Name: **R8-T198wt** **Catalog No.: 4592** **Batch No.: 1**

CAS Number: 2305815-72-7

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula:	$C_{111}H_{211}N_{59}O_{26}S$
Batch Molecular Weight:	2820.33
Physical Appearance:	White lyophilised solid
Net Peptide Content:	64%
Counter Ion:	TFA
Solubility:	Soluble to 2 mg/ml in 20% acetonitrile / water
Storage:	Store at -20°C
Peptide Sequence:	Gly-Gly-Gly-Arg-Arg-Arg-Arg-Arg-Arg-Arg-Arg-Gly-Cys-Lys-Lys-Pro-Gly-Leu-Arg-Arg-Arg-Gln-Thr

2. ANALYTICAL DATA

HPLC:	Shows 98% purity
Mass Spectrum:	Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid	Theoretical	Actual	Amino Acid	Theoretical	Actual
Ala			Lys	2.00	2.12
Arg	11.00	10.76	Met		
Asx			Phe		
Cys			Pro	1.00	0.99
Glx	1.00	1.03	Ser		
Gly	5.00	4.85	Thr	1.00	0.84
His			Trp		
Ile			Tyr		
Leu	1.00	1.01	Val

Product Name: **R8-T198wt** **Catalog No.: 4592** **Batch No.: 1**

CAS Number: 2305815-72-7

Description:

Cell-permeable peptide inhibitor of Pim-1 kinase, derived from $p27^{Kip1}$. Inhibits Pim-1 phosphorylation of $p27^{Kip1}$ and Bad; induces cell cycle arrest (at G_1) and apoptosis in DU145 prostate cancer cells. Also inhibits Pim-1-dependent growth of DU145 cells in vitro and in vivo. Displays no effect on the growth of normal prostate epithelial RPWE-1 cells at concentrations of 10 and 20 µM.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{111}H_{211}N_{59}O_{26}S$

Batch Molecular Weight: 2820.33

Physical Appearance: White lyophilised solid

Peptide Sequence:

Gly-Gly-Gly-Arg-Arg-Arg-Arg-Arg-Arg-Arg-Arg-Gly-Cys-Lys-Lys-Pro-Gly-Leu-Arg-Arg-Arg-Gln-Thr

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 2 mg/ml in 20% acetonitrile / water

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 64% (Remaining weight made up of counterions and residual water).

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such Cys, Met,Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
