Product Information

Print Date: Oct 2nd 2025

www.tocris.com

Product Name: Protease Inhibitor Cocktail I Catalog No.: 5500 Batch No.: 20

Description:

Protease Inhibitor Cocktail I is a blend of protease inhibitors optimized for mammalian cells. Contains the following inhibitors: AEBSF HCl (100 mM), Aprotinin (80 μ M), Bestatin (5 mM), E-64 (1.5 mM), Leupeptin (2 mM) and Pepstatin (1 mM). Cocktail is provided as 1 ml of 100X concentrate in DMSO.

Physical and Chemical Properties:

Physical Appearance: liquid

Storage: Store at -20°C

Solubility & Usage Info:

Soluble in DMSO (supplied pre-dissolved in 1ml DMSO)

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
