

Certificate of Analysis

www.tocris.com

Product Name: Spadin
CAS Number: 1270083-24-3

Catalog No.: 5594 **Batch No.:** 9

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₉₆H₁₄₂N₂₆O₂₂
Batch Molecular Weight: 2012.34
Physical Appearance: White lyophilised solid
Counter Ion: TFA
Solubility: Soluble to 2 mg/ml in water
Storage: Store at -20°C
Peptide Sequence: Tyr-Ala-Pro-Leu-Pro-Arg-Trp-Ser-Gly-Pro-Ile-Gly-Val-Ser-Trp-Gly-Leu-Arg

2. ANALYTICAL DATA

HPLC: Shows 98.6% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical			Actual		
Ala	1.00	1.01	Lys		
Arg	2.00	1.88	Met		
Asx			Phe		
Cys			Pro	3.00	3.04
Glx			Ser	2.00	1.94
Gly	3.00	2.95	Thr		
His			Trp	2.00	Not Detected
Ile	1.00	1.00	Tyr	1.00	1.01
Leu	2.00	2.04	Val	1.00	1.02

Product Name: Spadin

Catalog No.: 5594

Batch No.: 9

CAS Number: 1270083-24-3

Description:

Spadin is a potent TREK-1 channel blocker ($IC_{50} = 71$ nM). Enhances dorsal raphe nucleus 5-HT neurotransmission in mice. Induces hippocampal CREB activation and neurogenesis in adult mice. Exhibits antidepressant effects in mouse models of depression. Brain penetrant.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{96}H_{142}N_{26}O_{22}$

Batch Molecular Weight: 2012.34

Physical Appearance: White lyophilised solid

Peptide Sequence:

Tyr-Ala-Pro-Leu-Pro-Arg-Trp-Ser-Gly-Pro-Ile-Gly-Val-Ser-Trp-Gly-Leu-Arg

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 2 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
