Description:

CRT 0066854 hydrochloride is a protein kinase C (PKC) inhibitor. Inhibits PKC_ι and PKC_ζ (IC₅₀ values are 132 and 639 nM, respectively). Restores polarized morphogenesis in oncogene expressing MDCK cells, decreases colony formation in HeLa cells and inhibits lethal giant larvae 2 (LLGL2) phosphorylation.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
