

Batch No.: 3

CAS Number:

Certificate of Analysis

www.tocris.com

Catalog No.: 6149

Product Name: PA Janelia Fluor® 549, NHS ester

1811539-42-0

IUPAC Name: 2,5-Dioxo-1-pyrrolidinyl 3',6'-di-1-azetidinyl-2-diazo-2,3-dihydro-3-oxospiro[1*H*-indene-1,9'-[9*H*]xanthene]-6-

carboxylate

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: $C_{32}H_{25}N_5O_6$ Batch Molecular Weight:575.58Physical Appearance:Orange solidSolubility:DMSO to 10 mM

Storage: Store at -20°C

Batch Molecular Structure:

$$N-0$$
 N_2

2. ANALYTICAL DATA

HPLC: Shows 98.2% purity at 240 nm

¹H NMR: Consistent with structure Mass Spectrum: Consistent with structure

Description:

Key information: PA Janelia Fluor® 549, NHS ester is a yellow photoactivatable fluorescent dye; supplied with an NHS ester reactive group for the labeling of primary amines. Suitable for live and fixed cell imaging. Application: Suitable for single molecule tracking and super resolution microscopy (SRM) in live cells, specifically sptPALM (live cells) and PALM (fixed cells) techniques. Properties and Photophysical Data: Non-fluorescent until activated at 405 nm. NHS ester can be converted to relevant substrate for use in self-labeling tag systems, e.g. HaloTag® and SNAP-tag®. Can be multiplexed with PA Janelia Fluor® 646, N... Please see product specific page on www.tocris.com for full description.

Physical and Chemical Properties:

Batch Molecular Formula: $C_{32}H_{25}N_5O_6$ Batch Molecular Weight: 575.58 Physical Appearance: Orange solid

Minimum Purity: ≥90%

Batch Molecular Structure:

$$N-0$$
 N_2

Storage: Store at -20°C. This product is packaged under an inert atmosphere.

Catalog No.: 6149

CAUTION - This product is light sensitive and we recommend that the solid material and any solutions obtained are protected from exposure to light.

Solubility & Usage Info:

DMSO to 10 mM

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.

Licensing Information:

Sold under license from the Howard Hughes Medical Institute, Janelia Research Campus
