Description:

EHop 016 is a Rac inhibitor (IC₅₀ = 1.1 μM). Exhibits some selectivity for Rac1 and Rac3 over Cdc42. Blocks the interaction of Rac with guanine nucleotide exchange factor Vav2 in breast cancer cell lines expressing high levels of Rac activity and inhibits activity of Rac downstream effector PAK1. Also inhibits mammary tumor growth and metastasis in mice.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
