

Product Name: Biotin-NAD⁺

Catalog No.: 6573

Batch No.: 4

CAS Number: 146385-37-7

IUPAC Name: β -Nicotinamide-*N*⁶-[2-[[6-[biotinyl]amino]hexyl]amino]-2-oxoethyl]adenine dinucleotide

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₃₉H₅₇N₁₁O₁₇P₂S
Batch Molecular Weight: 1045.95
Physical Appearance: Colourless solution
Solubility: Soluble in water (supplied pre-dissolved at a concentration of 0.25mM)
Storage: Store at -80°C
Batch Molecular Structure:

2. ANALYTICAL DATA

HPLC: Shows 81.4% purity
Mass Spectrum: Consistent with structure

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: Biotin-NAD⁺

Catalog No.: 6573

Batch No.: 4

CAS Number: 146385-37-7

IUPAC Name: β -Nicotinamide-*N*⁶-[2-[[6-[biotinyl]amino]hexyl]amino]-2-oxoethyl]adenine dinucleotide

Description:

Biotin-NAD⁺ is a provides a convenient non-isotopic alternative to radiolabeled NAD⁺ for determination of IC₅₀ values for candidate PARP inhibitors and studies requiring this substrate. Biotinylated-NAD⁺ allows an indirect measure of PARP activity when biotin incorporation is detected using a conjugated-streptavidin detection system. Acts as a substrate for ADP-ribosylation. Can be used to label and purify biotinyl-ADP ribosylated proteins. This product is a replacement for R&D Systems product 4670-500-01. 131 μ g is supplied as 500 μ l of a 0.25 mM solution in water. Please see product specific page on www.tocris.com for full description.

Physical and Chemical Properties:

Batch Molecular Formula: C₃₉H₅₇N₁₁O₁₇P₂S

Batch Molecular Weight: 1045.95

Physical Appearance: Colourless solution

Batch Molecular Structure:

Storage: Store at -80°C

Solubility & Usage Info:

Soluble in water (supplied pre-dissolved at a concentration of 0.25mM)

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
