Description:

PAC₁ receptor antagonist. Inhibits PACAP-induced CREB phosphorylation in PAC₁, but not VPAC₁ or VPAC₂, expressing cells. Also inhibits PACAP-induced increases in cAMP levels in vitro (IC₅₀ = 2 nM) and PACAP-induced aversive responses and mechanical allodynia following intrathecal injection in vivo.

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
