

Product Name: LDV
CAS Number: 1155866-55-9

Catalog No.: 7020 **Batch No.:** 1

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₄₈H₇₀N₁₀O₁₂
Batch Molecular Weight: 979.13
Physical Appearance: White lyophilised solid
Net Peptide Content: 81%
Counter Ion: TFA
Solubility: Soluble to 1 mg/ml in 0.01M PBS (pH 7.4)
Storage: Store at -20°C
Peptide Sequence:

2. ANALYTICAL DATA

HPLC: Shows 99.1% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical		Actual		Amino Acid Theoretical		Actual	
Ala	2.00	1.88	Lys	1.00	1.03		
Arg			Met				
Asx	1.00	0.98	Phe				
Cys			Pro	1.00	0.98		
Glx			Ser				
Gly			Thr				
His			Trp				
Ile			Tyr				
Leu	1.00	1.05	Val	1.00	1.08		

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: LDV

Catalog No.: 7020

Batch No.: 1

CAS Number: 1155866-55-9

Description:

$\alpha_4\beta_1$ integrin (VLA-4) ligand ($K_d \sim 12$ nM). Non-fluorescent derivative of LDV FITC (Cat. No. 4577).

Physical and Chemical Properties:

Batch Molecular Formula: $C_{48}H_{70}N_{10}O_{12}$

Batch Molecular Weight: 979.13

Physical Appearance: White lyophilised solid

Peptide Sequence:

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 1 mg/ml in 0.01M PBS (pH 7.4)

This product is supplied as a lyophilized solid and may be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Net Peptide Content: 81% (Remaining weight made up of counterions and residual water).

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 μ m filter to remove potential bacterial contamination whenever possible.
