CAS Number: 3599-32-4

IUPAC Name: Sodium 4-(2-((1E,3E,5E,7Z)-7-(1,1-Dimethyl-3-(4-sulfonatobutyl)-1,3-dihydro-2H-benzo[e]indol-2-ylidene)hepta-1,3,5-trien-1-yl)-1,1-dimethyl-1H-benzo[e]indol-3-ium-3-yl)butane-1-sulfonate

Description:

Indocyanine green is a near infrared (NIR) fluorescent dye operating in the 700-900 nm wavelength range. It also exhibits fluorescence emission in the shortwave infrared window (SWIR; 1,000-2,000 nm) which enables in vivo imaging, including intravital microscopy, non-invasive real-time imaging in blood and lymph vessels, and imaging of hepatobiliary clearance. Imaging of indocyanine green in SWIR shows increased sensitivity, contrast, and resolution of fine anatomical structures over NIR. This product is supplied with a high degree of hydration and may contain residual inorganic salts, the amount of which are batch dependent. Please refer... Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. Our standard recommendations are:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
