

## Certificate of Analysis

[www.tocris.com](http://www.tocris.com)

**Product Name:** PEI STAR-Go™ transfection reagent

**Catalog No.:** 8174

**Batch No.:** 2

CAS Number: 49553-93-7

IUPAC Name: Poly[imino(1,2-ethanediyl)] hydrochloride

### 1. PHYSICAL AND CHEMICAL PROPERTIES

**Physical Appearance:** Colourless liquid  
**Solubility:** Soluble in Aqueous solution (supplied pre-dissolved at a concentration of 1 mg/mL)  
**Storage:** Store at +4°C

### 2. ANALYTICAL DATA

**<sup>1</sup>H NMR:** Consistent with structure  
**Performance:** pass

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

**Product Name:** PEI STAR-Go™ transfection reagent

**Catalog No.:** 8174

**2**

CAS Number: 49553-93-7

IUPAC Name: Poly[imino(1,2-ethanediyl)] hydrochloride

**Description:**

PEI STAR-Go™ is a ready-to-use aqueous formulation of our high performance PEI STAR™ transfection reagent (Cat. No. 7854), provided as a sterile-filtered solution. PEI STAR™ is a chemically-defined, linear polyethylenimine (PEI) transfection reagent for affordable and scalable transient gene expression. PEI is a synthetic polymer with an exceptionally high positive charge density in pH-neutral solutions. Positively charged PEI binds strongly to negatively charged DNA and imparts a net cationic charge, allowing the DNA to enter cells. PEI is a non-viral vector commonly used to transfect HEK293, CHO, and a range of other eukar... Please see product specific page on www.tocris.com for full description.

**Physical and Chemical Properties:**

Physical Appearance: Colourless liquid

**Storage:** Store at +4°C

**Solubility & Usage Info:**

Soluble in Aqueous solution (supplied pre-dissolved at a concentration of 1 mg/mL)

This product is supplied in aqueous solution at a concentration of 1 mg/mL

**Stability and Solubility Advice:**

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. \*Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

**SOLIDS:** Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

**SOLUTIONS:** We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
