

Certificate of Analysis

www.tocris.com

Product Name: PEI STAR-Go™ transfection reagent

Catalog No.: 8174

Batch No.: 3

CAS Number: 49553-93-7

IUPAC Name: Poly[imino(1,2-ethanediyl)] hydrochloride

1. PHYSICAL AND CHEMICAL PROPERTIES

Physical Appearance: Colourless liquid
Solubility: Soluble in Aqueous solution (supplied pre-dissolved at a concentration of 1 mg/mL)
Storage: Store at +4°C

2. ANALYTICAL DATA

¹H NMR: Consistent with structure

Caution - Not Fully Tested • Research Use Only • Not For Human or Veterinary Use

Product Name: PEI STAR-Go™ transfection reagent**Catalog No.:** 8174**Batch No.:** 3

CAS Number: 49553-93-7

IUPAC Name: Poly[imino(1,2-ethanediyl)] hydrochloride

Description:

PEI STAR-Go™ is a ready-to-use aqueous formulation of our high performance PEI STAR™ transfection reagent (Cat. No. 7854), provided as a sterile-filtered solution. PEI STAR™ is a chemically-defined, linear polyethylenimine (PEI) transfection reagent for affordable and scalable transient gene expression. PEI is a synthetic polymer with an exceptionally high positive charge density in pH-neutral solutions. Positively charged PEI binds strongly to negatively charged DNA and imparts a net cationic charge, allowing the DNA to enter cells. PEI is a non-viral vector commonly used to transfect HEK293, CHO, and a range of other eukar... Please see product specific page on www.tocris.com for full description.

Physical and Chemical Properties:

Physical Appearance: Colourless liquid

Storage: Store at +4°C**Solubility & Usage Info:**

Soluble in Aqueous solution (supplied pre-dissolved at a concentration of 1 mg/mL)

This product is supplied in aqueous solution at a concentration of 1 mg/mL

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Information concerning product stability, particularly in solution, has rarely been reported and in most cases we can only offer a general guide. *Unless contradicted by product-specific protocols or instructions, our standard recommendations apply:

SOLIDS: Provided storage is as stated on the product label and the vial is kept tightly sealed, the product can be stored for up to 6 months from date of receipt.

SOLUTIONS: We recommend that stock solutions, once prepared, are stored aliquoted in tightly sealed vials at -20°C or below and used within 1 month. Wherever possible solutions should be made up and used on the same day.
