| Gene ID                     | 9423                                                                                                                                                                                                                                                                                                    |
| Gene Symbol                 | NTN1                                                                                                                                                                                                                                                                                                    |
| Species                     | Mouse                                                                                                                                                                                                                                                                                                   |
| Specificity/Sensitivity     | Detects mouse Netrin-1 in direct ELISAs and Western blots. In direct ELISAs, approximately 10% cross-reactivity with recombinant chicken (rch) Netrin-1 and recombinant human Netrin-1 is observed and less than 1% cross-reactivity with recombinant mouse (rm) Netrin-G1a and rmNetrin-4 is observed. |
| Immunogen                   | Mouse myeloma cell line NS0-derived recombinant mouse Netrin-1 Val22-Ala603<br>Accession # AAC52971                                                                                                                                                                                                     |
